Arrange the paragraphs in the correct order.

- ☐

Global warming is a pressing issue that has been at the forefront of environmental concerns for many years. It is a complex problem caused by the increase in greenhouse gases in the Earth's atmosphere, leading to a rise in global temperatures.
- ☐

Addressing global warming requires a concerted effort from governments, businesses, and individuals. This can involve reducing carbon emissions, investing in renewable energy sources, and protecting and restoring natural habitats. It also requires a change in behavior, such as using public transport, reducing waste, and conserving energy.
- ☐

In conclusion, global warming is a serious issue that requires immediate action. By working together and making changes to our lifestyles, we can help to reduce the impact of global warming and protect the planet for future generations.
- ☐

One of the main causes of global warming is the burning of fossil fuels. This releases carbon dioxide and other greenhouse gases into the atmosphere, trapping heat and causing the Earth's temperature to rise. Deforestation and industrial processes also contribute to the problem, as they release additional greenhouse gases.
- ☐

The effects of global warming are wide-ranging and severe. They include extreme weather events such as hurricanes, droughts, and heatwaves, as well as melting glaciers and rising sea levels. These changes have a devastating impact on ecosystems, wildlife, and human populations.
