## Löse die Rechenaufgaben

1. A customer orders a Margherita pizza and a Coke. How much do they need to pay?

$$9.99 + 2.49 = \underline{\hspace{2cm}}$$

2. Sarah buys a Pepperoni pizza and a bottle of still water. What is the total cost?

$$11.99 + 1.99 = \underline{\hspace{2cm}}$$

3. Tom orders a BBQ Chicken pizza and a Dr. Pepper. How much does Tom pay?

$$13.99 + 2.49 = \underline{\hspace{2cm}}$$

4. Emma purchases a Supreme pizza and a bottle of sparkling water. What is the total amount?

$$15.99 + 1.99 = \underline{\hspace{2cm}}$$

5. Liam buys a Vegetarian pizza and a bottle of Sprite. How much does he spend?

$$14.99 + 2.49 = \underline{\hspace{2cm}}$$

6. Olivia orders two Sodas. What is the total cost?

$$2.49 + 2.49 = \underline{\hspace{2cm}}$$

7. Noah purchases a Pepperoni pizza and a domestic beer. How much does he pay?

$$11.99 + 4.99 = \underline{\hspace{2cm}}$$

8. Ava buys a Margherita pizza and a bottle of sparkling water. What is the total amount?

$$9.99 + 1.99 = \underline{\hspace{2cm}}$$
