

Fractions - Math Sports

Name: _____

Date: _____

Team	Matches Played	Wins	Draws	Losses	Goals Scored	Goals Against	Points
Bayern Munich	23	18	3	2	62	18	57
RB Leipzig	23	14	5	4	45	22	47
Borussia Dortmund	23	13	6	4	50	27	45
Wolfsburg	23	11	8	4	36	22	41
Eintracht Frankfurt	23	10	9	4	45	29	39

Solve the exercises (Round to two decimal places)

1. Eintracht Frankfurt won 10 out of their 23 matches played. What fraction of the matches did they win, and what is this fraction as a decimal?

$$\frac{\quad}{\quad} = \quad$$

2. Bayern Munich scored 62 goals and conceded 18 goals in their 23 matches. What fraction of the total goals in their games were scored by Bayern Munich, and what is this fraction as a decimal?

$$\frac{\quad}{\quad} = \quad$$

3. Wolfsburg had 11 wins, 8 draws, and 4 losses in their 23 matches. What fraction of their matches did they not lose, and what is this fraction as a decimal?

$$\frac{\quad}{\quad} = \quad$$

4. RB Leipzig scored 45 goals in their 23 matches. What fraction of their goals did they score per match, and what is this fraction as a decimal?

$$\frac{\quad}{\quad} = \quad$$

5. Borussia Dortmund had 13 wins, 6 draws, and 4 losses in their 23 matches. What fraction of their matches did they win or draw, and what is this fraction as a decimal?

$$\frac{\quad}{\quad} = \quad$$
